## INTRODUCTION

Welcome to my **Featured Guide** for *Grand Theft Auto: Vice City Stories* .

Here you will find guides to all the balloon locations, rampages, unique jumps & bonus missions, including screenshots of all the areas. You will also find maps covering both islands. I've included checklists in pdf format, to help you keep track of your progress in the game. You can find those in the download section.

Since there are a lot of different ways to solve the main missions, I won't give an in-depth description on how to do so, just what needs to be done and a simple description of the solution. Some of the mission tasks that characters give you can not be completed all at once, but you will notice when a character is available while you play. This also goes for some of the bonus missions.

You might want to find as many balloons as you can before you start on the main missions since the gangs will get hostile after some missions, which will make it harder too look for the balloons. You will also unlock weapon pickups when you find enough balloons which can help you complete some of the missions.
